TECHNICAL EXPERIENCE

AUBURN UNIVERSITY’S RADIO FREQUENCY IDENTIFICATION LAB April 2025 - Present
Simulation Team Lead

- Managed a multidisciplinary team of engineers developing an ML-powered XR tool for locating RFID tags using RSSI data.
- Created plugins enabling communication between Zebra handheld RFID readers and Android-based XR headsets.
- Developed an XR user interface for collecting positional RFID data used to train the tag-localization model.
- Presented my role in simulation projects to various professional organizations who visited the lab.

AUBURN UNIVERSITY BET HACKATHON TEAM April 2026
Applied ML Engineer

- Developed an edge compatible CV Machine Learning model running on a Qualcomm Uno Q SBC capable of identifying squirrels.
- Ensured scalability to support new features with little overhead.
- Coordinated team to meet tight deadlines by utilizing AGILE SCRUM workflows

DEAD TAG STUDIOS July 2026 - Present
Lead Technical Artist / Co-Founder

- Created 3D models, textures, animations, and game systems for various PC titles.
- Designed solutions to ensure designated concurrent processes functioned across all connected clients.
- Effectively communicated creative visons & decisions to guarantee team alignment on projects.

MODEM May 2026 - Present
Chief Technical Officer

- Founded a software/hardware startup geared towards bringing people together in social settings.
- Developed a Flutter mobile app that communicates with the firmware I developed for our nRF52840 prototype board.
- Lead presentations to pitch our product, business plan, and go-to-market strategy.

EDUCATION

AUBURN UNIVERSITY GPA 3.53 August 2023 - Present
Accelerated Bachelor Master Program in Data Engineering - Expected May 2028
Bachelor of Science in Computer Science - Expected May 2027
Minor in International Business Engineering & Technology

PROFILE

I strive to make a positive impact wherever I work. I believe the best learning begins in the field, not just in the classroom. Building a diverse skill set allows me to adapt, take on new roles, and approach problems from an array of perspectives. I know experience is built by doing, and there's always another skill to learn, challenge to tackle, or idea to explore.

SKILLS

- C#, C++, Python, SQL, Java, JavaScript
- Cross-Platform Software Development
- IoT Development
- Embedded Systems Development
- Full Stack Development

HOBBIES

- Motor Vehicle Repair
- Homelabbing
- Photography
- Cooking
- Hiking / Travel
